TROWELING AID

DESCRIPTION:

Troweling Aid is a 100% solids, non-hazardous non-evaporating, alcohol base, designed for aiding in troweling epoxy mortars that are difficult to work with. *Troweling Aid* allows the finisher to achieve a smooth finish even on the stickiest epoxy mortar systems. *Troweling Aid* will remove excess epoxy from tools and other equipment as long as the epoxy has not cured.

TYPICAL USES:

Applying to trowel by cloth to smooth out epoxy mortars
Cleaning trowels and other tools before epoxy has cured

FEATURES:

Non-hazardous
Non-evaporating

Viscosity: (@72°F)
20 cps

PRECAUTIONS:

This product could cause a loss in physical properties, chemical and heat resistance if added directly to the epoxy mortar system.

Always apply to a clean cloth and rub trowel down to clean off epoxy and excess liquid.

PACKAGING:

1 gallon can
5 gallon pail
50 gallon drum
